Application No.: 10/748739

Case No.: 59494US002

Amendments to the Claims:

The following Listing of Claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

2. (Currently Amended) A polymeric grout composition comprising (1) polymeric resin, (2) filler, and (3) one or more urethane oligomers of at least two polymerized units, wherein said oligomers comprise the reaction product of:

- (a) one or more polyfunctional isocyanate compounds,
- (b) one or more polyols,
- (c) one or more monoalcohols selected from the group consisting of fluorocarbon monoalcohols, ~~optionally-substituted~~ long-chain hydrocarbon monoalcohols, and mixtures thereof; and
- (d) one or more silanes of the following formula:

wherein

X is an isocyanate reactive group selected from $-NH_2$, $-SH$, $-OH$, or $-NRH$, where R is selected from the group consisting of phenyl, straight and branched aliphatic, alicyclic, and aliphatic ester groups,

R^1 is an alkylene, heteroalkylene, aralkylene, or heteroaralkylene group, and

each Y is independently a hydroxyl, a hydrolyzable moiety selected from the group consisting of alkoxy, acyloxy, heteroalkoxy, heteroacyloxy, halo, and oxime, or a non-hydrolyzable moiety selected from the group consisting of phenyl, alicyclic, straight-chain aliphatic, and branched-chain aliphatic, wherein at least one Y is a hydrolyzable moiety.

2. (Newly Presented) The grout composition of claim 1 wherein said polymeric resin is selected from the group consisting of epoxy-containing resins and acrylate-containing resins.

3. (Newly Presented) The grout composition of claim 1 wherein said filler is selected from the group consisting of silica sand, limestone, titanium dioxide, and talc.

Case No.: 59494US002

4. (Newly Presented) The grout composition of claim 1 wherein said composition contains from about 0.01 to about 1 weight percent of said urethane oligomers.

5. (Newly Presented) The grout composition of claim 1 further comprising at least one selected from the group consisting of biocide, surfactant, anti-foam agent, anti-slip particles, and colorants.
